

Aichi Steel to Exhibit MI Sensor at Sensors Converge 2023

Aichi Steel Corporation (President: Takahiro Fujioka) will exhibit our MI Sensor at "Sensors Converge 2023", North America's largest electronics exhibition for design engineers, from June 20 to 22.

At the exhibition, we will introduce our proprietary ultra-sensitive magnetic sensor, the MI Sensor*, including additions the product range and potential applications that benefit from its performance, such as security gates, foreign metal object detection and lithium-ion battery inspection.

We aim to promote the high functionality and wide range of applications of MI Sensors, as well as to seek potential customers and cultivate overseas markets by interacting with visitors.

* For more information on the MI sensor, please see our website.
