

## Business development

## Aichi Steel's Products at Work in Society

Starting from our core business of specialty steel and forged parts for automobiles, we leverage our technology and manufacturing capabilities to provide a diverse product range spanning infrastructure materials, electronic components, functional materials, and products for the medical and agricultural fields.

We contribute to safe and secure living through our environmentally-friendly manufacturing based on resource circulation.

## ● Market composition by sector

Electronic devices &amp; magnetic materials

approx 8%

Industrial &amp; construction machinery

approx 12%

Infrastructure &amp; construction materials

approx 5%

Automotive  
approx 75%

## Medical equipment, etc.

- Dental magnetic attachments, etc.

## Building &amp; Infrastructure materials

- Stainless steel for building structures, etc.

## Iron fertilizers for agriculture

## Autonomous driving / EV support

- GPMS magnetic positioning system (Autonomous driving support)
- e-Axle components
- Lead frames for power cards, etc.

## Automotive forged products (using specialty steel)

- Engine parts
- Transmission parts, etc.
